

The New Sapphire Community Portal - Information for Parents and Students

Exciting changes are coming to the Sapphire Community Portal (SCP) formerly known as the Community Web Portal! The redesigned SCP will have updated logos, colors, and illustrations and is built to be used on almost any internet-connected device - computer, tablet, or phone. It is easier to navigate and upload documents.

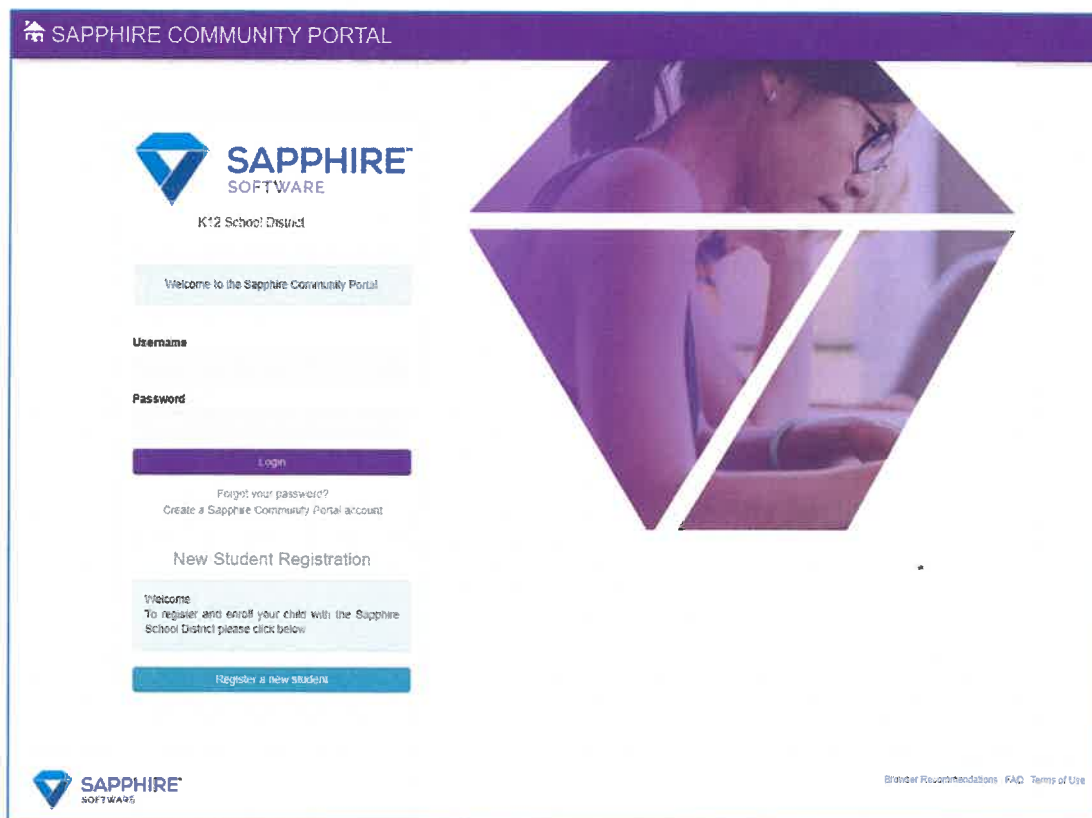

In addition, users will no longer need a PIN to log on. User accounts will be automatically converted, with virtually no effort.

The new SCP will be released in Summer 2021.

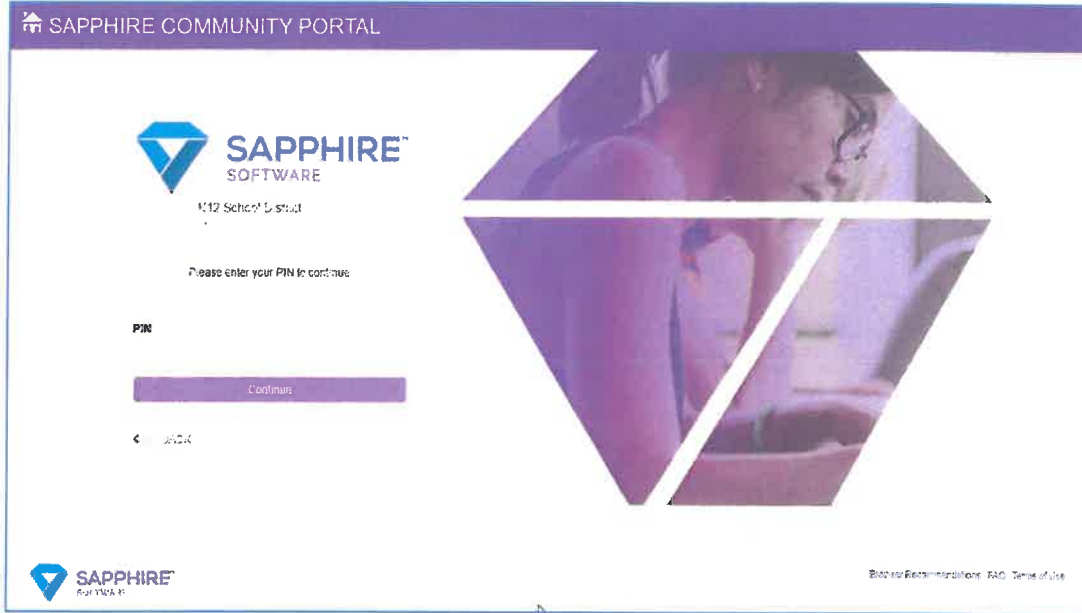

The New Sapphire Community Portal

Accounts will be automatically upgraded in three easy steps.

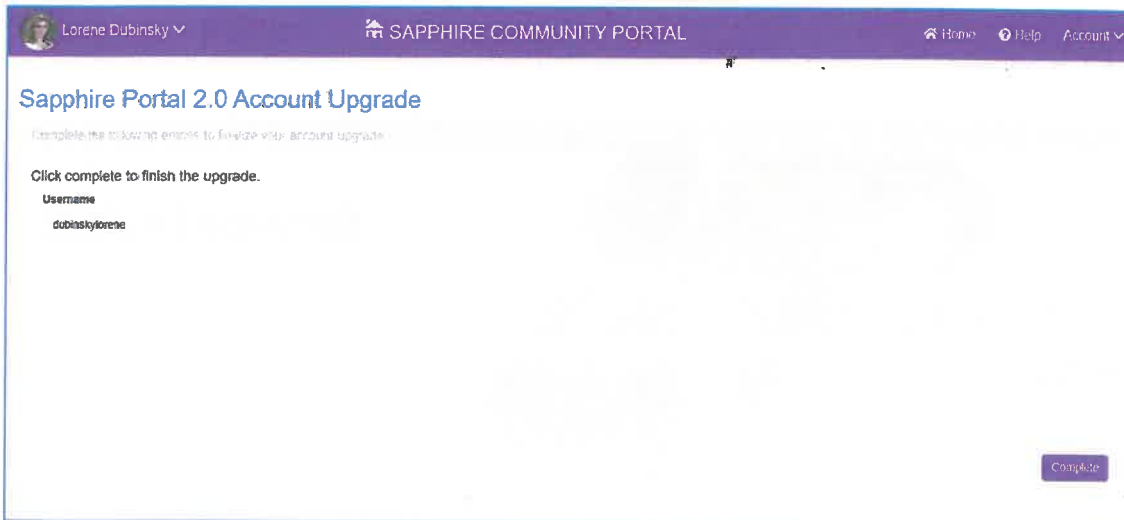

1. Parents and students will log in to the new SCP at the same URL and with the same **Username** and **Password** they currently use.

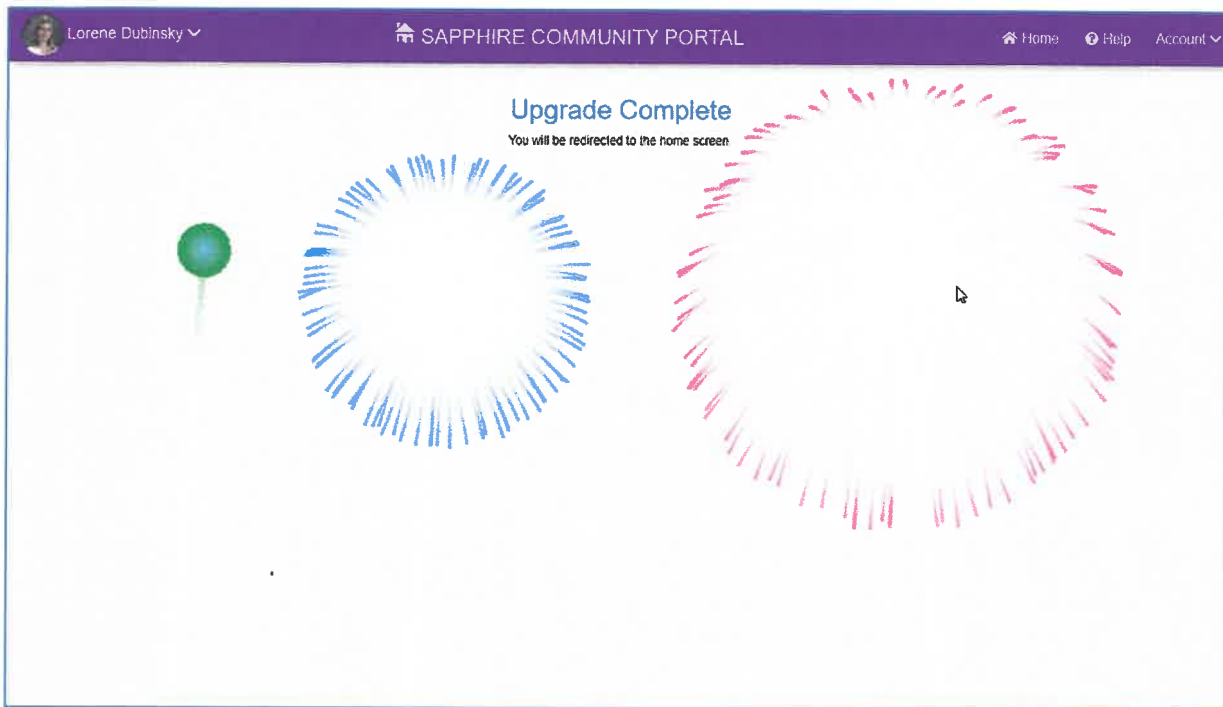

2. All users will be prompted to enter their PIN one final time to continue.

3. Parents will be prompted to change their **Password** and may be prompted to change their **Username**. Students will continue to use the same **Password** and **Username**. All users must click or tap **Complete** to continue.

The **Upgrade Complete** screen displays and users are redirected to the new SCP home screen.

FAQs for Parents and Students

How will accounts be converted?

When the new Sapphire Community Portal is released, parents and students will log in once with the same username, password, and PIN they used previously.

- Parents will have the option to change their username, and will be required to change it if there is a conflict with another account. Students will not be able to change their username.
- Parents must change their password. Students will not be able to change their password.

Why must parents change their passwords but not students?

Many schools use the same student username and password combinations for other utilities. For that reason, Sapphire is not requiring a password change.

Why can parents change their usernames but not students?

Student usernames are created by school administrators and are often used for other utilities in the school system.

Can a parent change their username to an email address?

Yes, they can. The new SCP allows email addresses to be used as account usernames.
